

31 August 1983

MEMORANDUM FOR THE RECORD

FROM: [redacted]  
Chief, Classification Review Division  
Office of Information Services, DDA

SUBJECT: Researchers Request for Access to Material  
Held at WNRC

1. On 31 August 1983, I received a call from Bill Lewis, NARS, who works at the WNRC in Suitland. Lewis informed me that there were two employees [redacted] Corporation of McLean, Virginia who are doing official research for RADCOM on Soviet heavy artillery from the 1930's to 1962. They are [redacted] and [redacted]. In their research, they want to look at the General Staff ACSI-G2 file in RG 319 at WNRC. CRD did a survey of that file a couple of years ago and requested that researchers not be given direct access to the index because of the aggregate effect one can get from a large number of reports on a single subject.

2. Lewis confirmed that [redacted] have TOP SECRET clearances. I told Lewis that the researchers could have access to the index and any Agency reports relating to their topic but we would have to review all the documents and notes they take before any such material could be removed from the WNRC. He agreed.
